AIP Establishes New Online Subscription Options for 2007

Lee C. Teng: Argonne National Laboratory (ca. 1962)

Physics Today offers online subscriptions to institutions

AIP's flagship magazine, *Physics Today*, has established online options for libraries in 2007. Print subscribers can gain access from 2000 to all but the most recent 12 months of the magazine for an additional \$200. Add this important new resource to your subscription today.

AIP Conference Proceedings creates online subscriptions to seven topical subseries

In 2007, for the first time, AIP is giving libraries the option of receiving online subscriptions to any of seven new subseries. These include: Materials Physics and Applications; Astronomy and Astrophysics; and Atomic, Molecular, and Optical Physics. Subscriptions include all titles in a subseries back to Jan. 2000.

Biomicrofluidics - New AIP open access journal is now available online

Biomicrofluidics is a new online-only, open access journal with rapid publication time, which draws research from specialists in engineering, physics, rheology, chemistry, and biology. Add *Biomicrofluidics* to your e-journal listing today. Visit <http://bmf.aip.org>.

New Subscription options for established AIP journals

Two well-respected AIP journals, *Journal of Applied Physics* (JAP) and *The Journal of Chemical Physics* (JCP), have broken out a subset of their content and offer it as a separate online subscription. From JCP comes *JCP: Biochemical Physics*, and from JAP comes an online edition of *Applied Physics Reviews*.

a Journal of Cross-Cutting Physiological Research

Physiology (formerly *News in Physiological Sciences*) publishes invited review articles written by leaders in their fields. These articles are peer-reviewed and highlight major advances in the broadly defined field of physiology. The journal also publishes shorter articles that either highlight important emerging topics and technologies or explore differing points of view. Finally, the journal identifies and briefly summarizes some of the most exciting new papers in physiology. With a new format that is both exciting and attractive, the journal is a valuable tool for researchers, educators, and students.

Physiology is published jointly by the International Union of Physiological Sciences and The American Physiological Society. It is indexed by Medline and PubMed.

Physiological

Genomics

**IMPACT
FACTOR
4.636!**

www.physiolgenomics.org

Physiological Genomics (physiolgenomics.org) is an online-first publication of The American Physiological Society (APS).

Physiological Genomics publishes studies that merge high-throughput data sources and hypothesis-driven research into a cohesive picture of cellular, tissue-level and whole-organism function (systems biology). This includes expression profiling, proteomics, gene targeting, comparative genomics and the genetics of complex disease. The application of these new genomic tools and reagents is rapidly enriching our understanding of physiological systems and transforming our thinking about biological problems. *Physiological Genomics* provides a speedy electronic peer review process, with the average time from submission to first editorial decision under a month, and immediate electronic publication of papers upon acceptance. *Physiological Genomics'* 2005 Impact Factor is 4.636.

Open Access: Authors can choose to pay a \$750 fee in addition to regular author fees to have their article published online with Open Access from the first date of publication. Twelve months after publication, all online articles are made freely accessible to the world, regardless of the author's choice.

Jobbers serving libraries with any book in print.

**"I think I've finally gotten the
serials list back into shape."**

**"How about the
standing orders?"**

**"They've always been
with Midwest. Never had
a problem there!"**

For over forty years, Midwest Library Service has been quietly relieving librarians of the problems often associated with book and standing order purchasing.

Our Continuation & Standing Order Service is based on intensive, personal contact with thousands of publishers to ensure prompt and complete fulfillment on series, sets, annuals, yearbooks, and proceedings. It is our goal to take the guesswork and anxiety out of continuations and standing order fulfillment through timely shipments and thorough reporting.

Using sophisticated tracking programs, Midwest monitors pre-publication information and shipping schedules instead of relying on publisher-based systems. We will customize the fulfillment frequencies on annuals and yearbooks on a title-by-title basis. In the case of a delayed or missing edition, we contact the publisher by telephone to ensure fulfillment. Of course, you have access to historical fill data whenever needed. And to make matters even easier for you, we will assist in the seamless transfer of standing orders placed previously with publishers or other booksellers.

In an unstable time of publisher upheavals and understaffed, harried libraries, isn't it good to have a vendor you can count on?

If you are not completely satisfied with your current vendor, look to Midwest for all your book buying needs.

For more information, contact a Standing Order specialist at 800-325-8833 or standingorders@midwestls.com.
